The bedroom is painted to give the feeling of being on a porch. The bed boasts garden decor with ivy and mini lights wound through the lattice work on the canopy of the bed and a lovey rose pattern quilt. Two of the walls in the bedroom are finished in pine and the ceiling is done in beadboard.

We bring the charm of the english gardens that grace the grounds of the Bed and Breakfast indoors. As you lay in bed you see a fountain statue as well as baskets of hanging flowers that are painted to look like they are hanging from fretwork. Two kittens are sitting on the porch railing. Butterflies, bumble bees, and ladybugs hover near the flowers.

A dining area for two makes a great place to enjoy a scrumptious breakfast and to look out at our expansive gardens.

The sitting room has a daybed with lots of pillows for lounging that's a great place to play the romantic couples game, "Enchanted Evening", and will give you some ideas for your honeymoon.
