

Lazy Cloud

Bed and Breakfast

- **Paul Newman Suite**

At our Lake Geneva romantic bed and breakfast we help couples plan romantic getaways that will be remembered a lifetime!

Let us help you plan yours! Any one of our beautiful suites will be wonderful for your Lake Geneva getaway or honeymoon...but the Newman Suite has been lent something extra from Mr. Romance, himself!

The Lazy Cloud, a Lake Geneva Romantic Bed and Breakfast, has named this suite for Paul Newman.

The current property was the summer residence of Paul Newman in 1950 while doing summer stock at the nearby Belfry Theater. We don't know exactly which room he stayed in, but we decided one of our romantic, honeymoon getaway suites should be named in his honor!!

The room retains an atmosphere that is reminiscent of the stables at the polo lodge, which was it's original use.

Rustic wide pine boards cover the walls and ceiling, while the floor is done in hunter green carpeting. The big, comfortable daybed is a wonderful place to "snuggle" with your honey in front of the massive fieldstone fireplace.

An intimate dining area for two is situated near the double whirlpool. It's a great place to enjoy your breakfast in the morning since you can also enjoy the fireplace from here.

The canopy bed was handmade from 4×4 posts. The beautiful bed linens and canopy are done in a soft green floral pattern and invite you to relax and unwind on your honeymoon getaway.

The double whirlpool has a canopy made of 4×4 posts like the bed and has a phenomenal

view of the field stone fireplace.

Along with the glowing tea light candles the candle style lighting can be dimmed for romantic ambiance.

Cozy up in front of the fireplace with one of our yummy picnic baskets.

Getaways at this Lake Geneva romantic Bed and Breakfast are special and we can help make your getaway perfect!

Either our Sweet Indulgence Special or our Romantic Escape Package would be a great addition to your getaway or honeymoon.

Call today and let us help plan your honeymoon getaway!
